What is PhotoPrintMe?

**Photo
Printme!**

PhotoPrintMe is a photo printing solution that gives to customers access to a wide variety of products and formats through a mobile device. An access to an online catalogue to create photographic products starts it all. Where can they access it from? From your own shop or anywhere else (home, office, etc...).

Only Internet connection is required, so simple like that!

Including advanced features like online payment or home delivery is a perfect solution for 24h photo printing service available in your store or business. And easy to integrate in your website.

PhotoPrintMe is a cost-effective photography service you can offer in your store.

Main features

- > PhotoPrintMe dedicated device
- > Small size (only 0.09m²), for a flexible layout in the store
- > Cardreader USB3.0 for USB source
- > Remote settings and configuration
- > Easy to use by end user and shop operator
- > Collect and/or Order configurable

Why PhotoPrintMe station?

PhotoPrintMe Station PPM215C is specifically designed for a full PhotoPrintMe performance in the store, to cover the several configurations that shop operator may need: order processing, or just order collection, or both of them. Includes the PhotoPrintMe Station software, with local and remote functions to deliver key features, for both shop operator and end user, for a great photo printing service in the store.

For shop operators

PhotoPrintMe Station PPM215M allows you to easily configure the kind of service (order, collect or both) you want to set up in the store.

Allows you to operate with your already existing **Citizen CX-02, CX-02W and CY-02** to provide photo printing management advanced features in the store, such as:

- High throughput/multiformat (more than one printer)
- Local Error Checking management
- Remote capabilities: Support, Management, Settings and Updates.
- Multiple printer models compatibility for PhotoPrintMe products printing:

Citizen CX-02

Citizen CX-02W

Citizen CY-02

For customers in the store

Allows to easily create PhotoPrintMe Orders in store from USB/SD Cards and pendrives.

Small Size

Designed to meet Retail operating environments, with a reduced footprint size (only 0.09m²) and a comfortable touch display mobile-like format. Depending on the needs in the store, allows to be configured for a flexible use like an:

PhotoPrintMe Station To allow end users to Create and Collect PhotoPrintMe Orders.

PhotoPrintMe Collect Station To allow end users to Collect their already placed PhotoPrintMe Orders.

PhotoPrintMe Order Station To allow end users to send regular print orders to their Citizen **CX-02, CX-02W and CY-02** via the PhotoPrintMe Service.

Features

Cardreader USB 3.0 for traditional USB source Allows the creation of PhotoPrintMe Orders in store from USB sources, such as SD Cards and pendrives.

Remote settings and configuration Advanced remote settings and updates for a comfortable and updated operation in the store. Remote support and local error checkings make easy to bring an optimal photo printing service.

Easy to use by end user and shop operator Thanks to the PhotoPrintMe Station software, the end user can quickly place PhotoPrintMe Orders in a intuitive user interface. The shop operator can easily manage the PhotoPrintMe service and settings in a very quick and intuitive manner, in special for those store chains who may need to manage several PhotoPrintMe stores.

Flexible Shop Layout in the store

PhotoPrintMe Station PPM215C is a flexible shop solution to create, collect and manage photo printing orders. It will fit in almost every store environment and design.
